

HABITATS

Match the animal to the name of their home by drawing a line.

Lizard

Tree Hollow

My home keeps me warm in winter and cool on hot summer days.

Cockatoo

Burrow

I can dig my own home in the ground.

Possum

Pond

I need to be in water part of my life but can climb onto land once I grow legs

Wombat

Forest floor

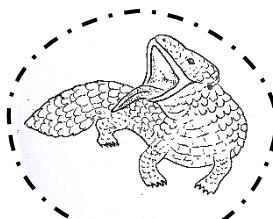

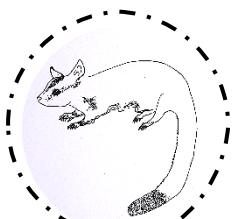

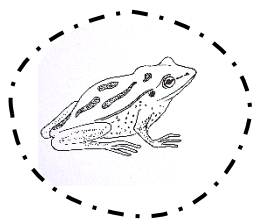

I like to hide under fallen leaves and logs.

Frog

Tree perch

I can fly but can also climb onto branches where I look for food and sleep at night.

Cut out the animals and place them in their home on the next page.

Can you label the name of the home and the animal that lives there? Write their names on the next page. Or cut and paste the labels.

Possum

Cockatoo

Frog

Wombat

Lizard

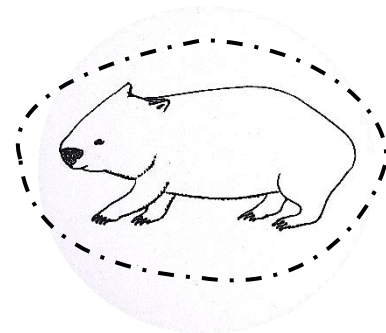

Tree Hollow

Tree perch

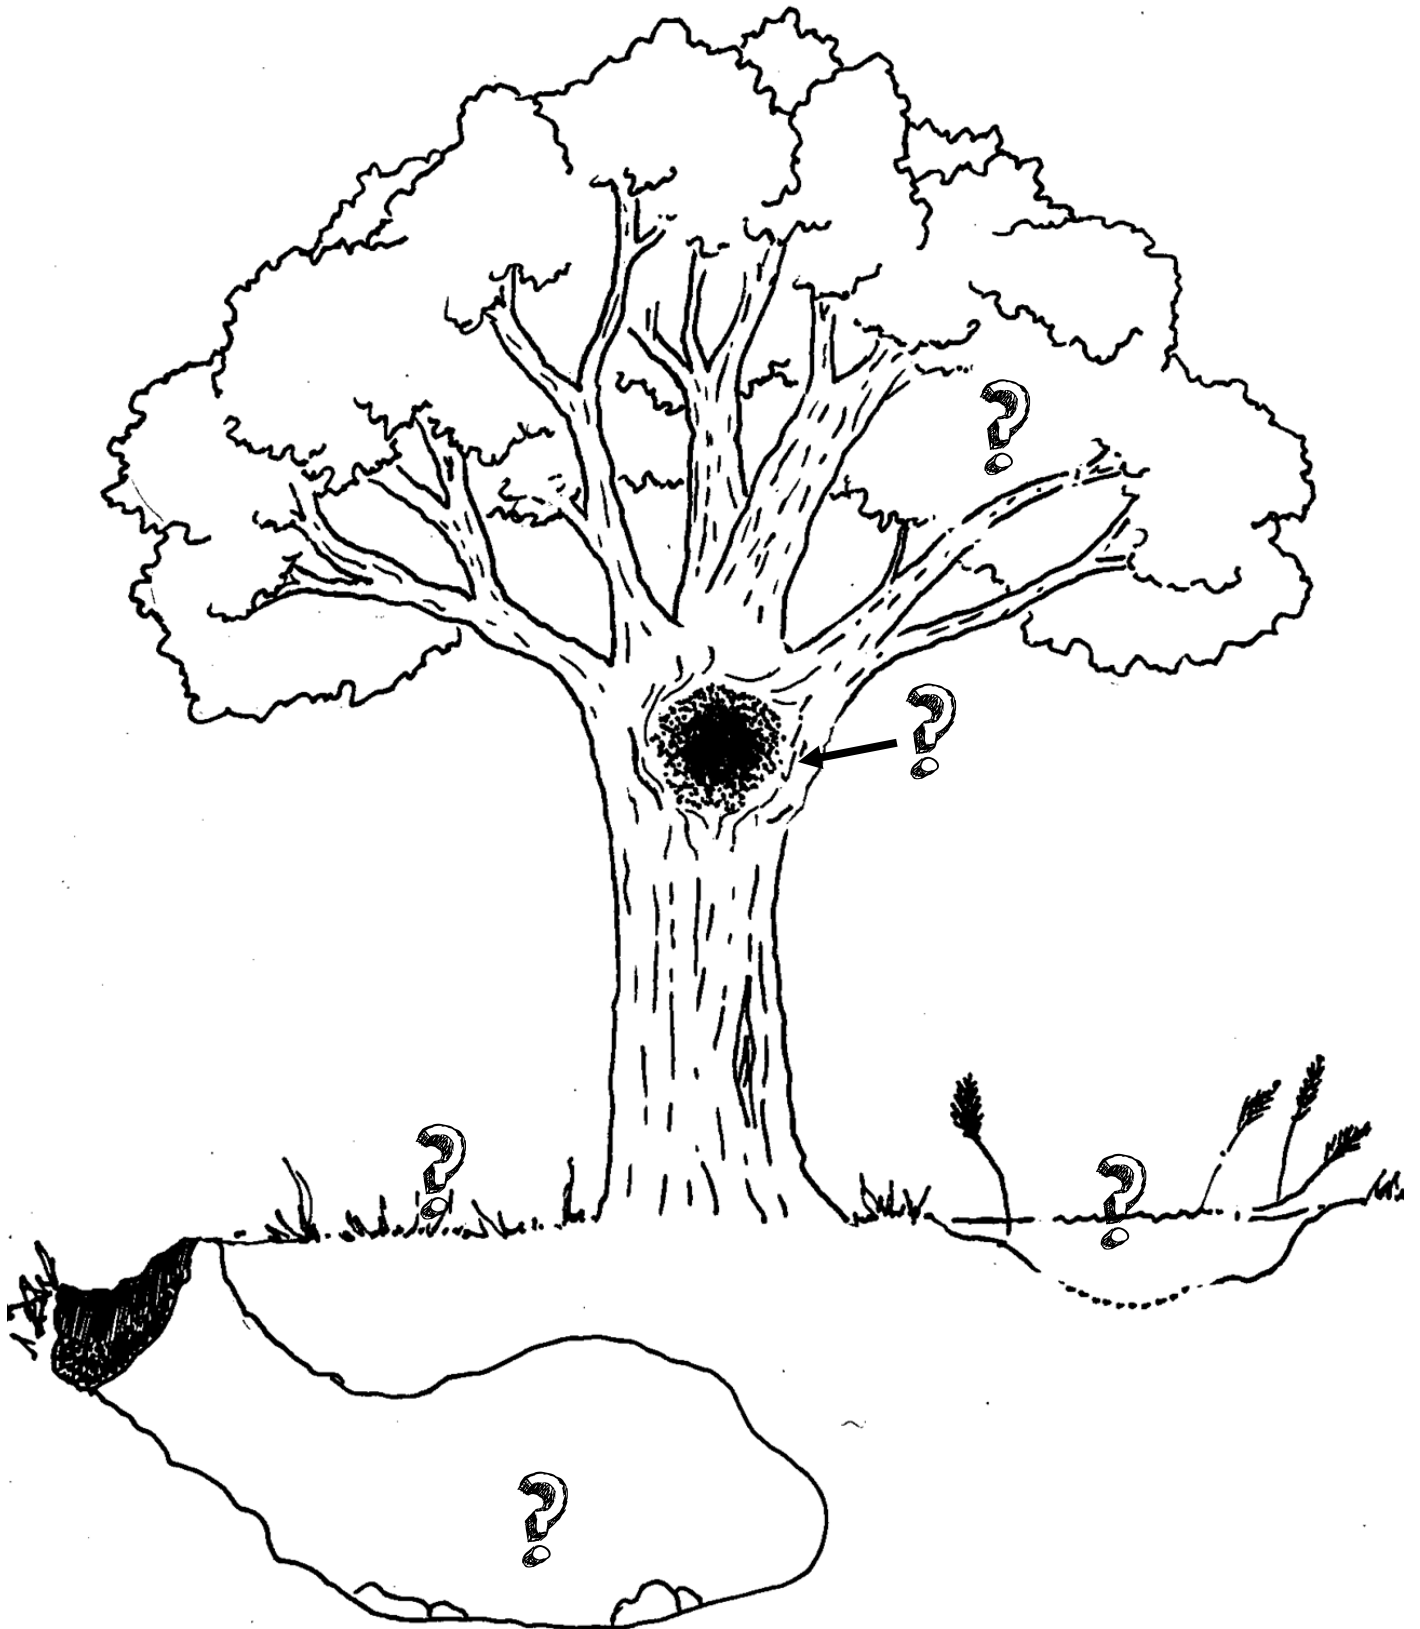

Pond

Burrow

Forest floor

A habitat is an area where many living and non living things exist together. In a forest habitat there are many different places where animals might live. These are their homes. They need both their homes and the whole habitat to live.

Draw a zoo enclosure or wild habitat that has everything your animal ambassador needs to survive.

Remember they also need things to help them have an enjoyable life.
